Corporé

Together we're better

Profile

- Marian is a registered nurse. She has worked in general medical, surgical, gynaecology, renal transplant, paediatric and orthopaedic fields prior to commencing an extensive role in brain injury and spinal cord rehabilitation.
- She has vast experience with individuals with spinal cord injuries. Marian has worked in a spinal injuries centre specialising in delivering acute care to the spinal injured ventilated person.
- Marian worked as an NHS case manager within the spinal injuries unit at Stoke Mandeville Hospital and was involved in liaising with the statutory services to coordinate safe discharge of the spinally injured into the community.
- Marian has also worked in the community providing domiciliary care for individuals requiring mechanical ventilator support.
- Marian has extensive experience working as a case manager within the legal process whose responsibility is to rehabilitate her clients with spinal cord injuries, complex orthopaedic injuries and brain injury.

Testimonial

"During my nursing career I have predominantly worked within catastrophic spinal cord and brain injuries both in the acute stages and during the period of extensive rehabilitation and onward to the injured person's discharge home. The work has been both challenging and immensely rewarding when results are achieved and the clients maximum independence and quality of life is regained to ensure they have the opportunity to lead fulfilling lives. Having a specific nursing background in spinal cord injury and traumatic brain injury has enabled me to utilise my skills and knowledge to provide effective case management for my clients over the past ten years"

Continued Professional Development

- Corporé are committed to facilitating the requirements for on-going CPD for our registered professionals, so that they can demonstrate their current competence in their chosen field.
- We have an external expert clinical panel who contribute to our clinical governance for continuously improving the quality of our services and safeguarding high standards of care.
